

Course: ECE 396

- Instructor: Renata A. Revelo, email: revelo@uic.edu
- Lecture delivery method: Blended. There will be pre-recorded videos that students will watch prior to the synchronous sessions. Synchronous sessions will be held during listed class time. During synchronous sessions, students will engage in teamwork and active learning activities to expand on the pre-recorded videos. Synchronous sessions will be done via Blackboard and will also utilize other tools such as Google Slides, PollEverywhere, and Slack. Synchronous sessions are optional, but highly encouraged. If students cannot attend synchronous sessions, they will still need to find a synchronous time to meet with their team at least twice a week.
- Textbook: A required textbook is available at the UIC Bookstore. Unfortunately, there are no digital copies of the textbook available for purchase.
- Note: A survey will be sent to students prior to the first week of classes to assess technological needs, time zones, and other concerns for engaging with this course.
- Laboratory delivery method: Not applicable
