

Course: ECE 210

- Instructor: Jim Kosmach kosmach@uic.edu
- Lecture delivery method: online synchronous
- Laboratory delivery method: online synchronous
- Lab Fee: \$50
- How the lab will be run:
 - There will be roughly 10 lab sessions, starting in week 3 of the semester with a frequency of a lab every 1 week. The labs will use Multisim Live circuit simulation software.
 - Student groups: Students will work individually on each lab experiment
 - Pre-lab work: Students will have the lab assignment at the start of each week. Each lab assignment will be accompanied by some helpful videos. A pre-lab circuit analysis will need to be completed before the start of the lab.
 - Lab work: Each student will attend their scheduled lab session to complete their simulations and lab report. TAs will be available in real-time to answer any questions about the pre-analysis and lab simulations. Each student will submit their lab report electronically to Blackboard by the end of their lab session. It will be graded by the TA and the grade will be made available before the next lab session.
 - Interactions with TAs or Instructor: TAs will be available online for questions during their scheduled lab time. The instructor and TAs will be available via Piazza.
