

Course: ECE 265

- Instructor: Vladimir Goncharoff, volodia@uic.edu
- Lecture delivery method: synchronous online, at the scheduled lecture times. Lectures will be recorded and made available to all students registered for the class via Blackboard.
- Laboratory delivery method: online asynchronous
- Lab Fee: \$50.
- How the lab will be run:
 - Lab assignments will commence in Week 3 of the semester, with a frequency of one lab every 1.5 weeks or so.
 - Students will use a free online digital logic circuit simulator to design, build, test, and analyze circuits according to specifications. No additional lab equipment or parts are required.
 - There is no need to attend the lab online during the scheduled lab time period; instead, that time will be used for TA office hours.
 - Student groups: Students will work in groups of 2-3 on each lab experiment, on their own time.
