

Course: ECE 465

- Instructor: Shantanu Dutt, email: dutt@uic.edu
- Lecture delivery method: online synch, recorded
- Laboratory delivery method: not applicable

Caveat: While there is no formal lab, there is a lab-like configuration in this course: there are 2 major projects that require the students to be introduced to two major software CAD tools. This we [mainly the TA] did by reserving the computer instruction lab [I think 4050 SEL] during a lecture time, and demoing the tools that the students followed along by using those tools as per the demo on the computers in the lab or their own laptops. We will replace this by possibly two online “lab” demo sessions in lieu of regular lecture.
